### SUMMARY

"An Energetic self-taught web developer and Engineering graduate equipped with a passion for coding and program functional websites. Actively seeking for an opportunity in an organization to enhance creativity and expand my skill set."

### EXPERIENCE

#### Java Full Stack developer Trainee (July 2023 - Present) at Palle Technologies, Bengaluru - Apprenticeship

- As a Java Full Stack Developer apprentice at Palle Technologies, I have honed my logical thinking and creative design skills through hands-on experience in both frontend and backend development.
- Leveraging my strong foundation in Java, JavaScript, MySQL database and object-oriented programming.
- Created some user-friendly frontend projects, showcasing a keen eye for architectural design. Currently working on learning new software and new technology (backend) to make continuous improvement for product management and supportability, efficiency, maintainance by monitoring the projects.

### PROJECTS

#### Personal Portfolio website

- Created a captivating personal portfolio website highlighting skills, projects, and professional journey using HTML, CSS, and JavaScript.
- Enhanced user experience through a responsive and modern design, skillfully blending creativity with functionality for an impactful visual appeal.

#### Online Book Store

- Our online bookstore website is a platform designed for book enthusiasts to explore, discover, and purchase a wide range of books from various genres. With a user-friendly interface, intuitive search features, and seamless checkout process, it offers a delightful experience for book lovers.
- Developed a feature-rich Website of the Online book store using a combination of HTML, CSS, and JavaScript.

#### JAVA Console project - CRUD operation

- A console-based application with CRUD operation ( Create, Read, Update, Delete ) created using Java programming language. MySQL database is used to store and retrieve data and Connectivity between Java and MySQL is done via JDBC API.

### CERTIFICATE

- Java full Stack Development at Palle technology, Bangalore.
- Typewriting (First Class Lower and Higher).
